Message from the (Past) President

Chris Kane

It’s the first week of May after the warmest winter on record (or, at least, it felt that way). The Lake is awakening for summer 2015. We are all looking forward to soft breezes, clear water, lazy days, and lots of summer fun with family and friends on the best lake in the Northwest.

Your LCIA Board met three times during the off season, with the following key results:

1. After an extensive search, we are nominating candidates for President and Vice-President of the LCIA;

2. Larita Humble briefed us on Phase 1 of the off-season CC landscaping project, now completed;

3. As of December 31, 2014, the balance in the LCIA account was $46,952 in the bank, net of liabilities;

4. We adopted protocols governing usage of the CC for private events; and

5. We established Board goals for 2015.

Our readers will hear the details of 2, 3, and 4 at the first general meeting on Memorial Day Saturday. I would like to focus on our leadership candidates and Board goals for 2015.

Dan Pugerude and Shannon O’Kelley have agreed to stand for our vacant President and Vice-President positions as officers of LCIA and ex officio members of the Board. Dan, a retired educator, and his wife, Kathleen, reside full-time on North Shore Drive after many years as summer residents. Shannon and his wife, Tyra, are finishing a new Lakehouse on Lucky Lane. Nominations from the floor at our first general meeting in May are always welcome.

At our March Board meeting, the Board committed to completing the Community Center landscaping project. We also outlined goals to pursue in 2015:

1. Developing hiking and biking clubs;

2. Building membership through more social and community activities, including classes, such as fitness classes;

3. Sponsoring another “History Nite” and memorializing last July’s History Nite with a DVD of Lake Cavanaugh stories from the 1950’s and 60’s by Travis Lawton, Lake resident and video professional;

4. Enhancing our membership benefits, including electronic communications; and,

5. Monitoring Lake levels thru the Geivett Committee.

We want our membership’s feedback on these goals. We also need volunteers to make our goals a reality. Has the Board missed a goal that many of our Lake Community support? You need to be at the May 23rd meeting for your voice to be heard.

At the first general meeting, we will also be discussing how best to finish the CC Landscaping Project and a proposed budget for the consideration of our members. It is likely that this proposed budget will be voted on at the July 4th general meeting.

So, we hope to see all of our members at the May 23rd meeting. Memorial Day is early and Labor Day is late this year—2015 may be the longest official summer that’s possible. **LET’S MAKE IT A GREAT ONE!**
“Everything old is new again” - the 2015 Lake Cavanaugh Community Sale is coming soon!

Sale Dates: July 3rd, 4th & 5th, 9am - 5pm

There are several ways to participate:

1) **Provide sale items!** Community Sale items may be left at the Community Center beginning Saturday June 27th. NOTE: All items must be CLEAN & WORKING. Large items may be OK’d by an on-site sale volunteer - if someone is on site. If a volunteer is not available, PLEASE TAPE YOUR NAME & PHONE NUMBER ON THE ITEM. **DO NOT BRING:** Old Tires, Old Analog TVs, Old Computer Equipment. Large items not sold MUST be picked up after the sale. All proceeds go towards running the Lake Cavanaugh Community Center.

2) **Volunteer!** Lunch and snacks are necessary for those working the sale. If you can help, please bring food items to the LCCC anytime from Saturday June 27th through Sunday, July 5th.

3) **Shop!** Come by the LCCC, peruse and buy treasures anytime between 9am-5pm each sale day.

Take note: **This is NOT a DUMPING SITE!!!** If you need or want additional information, please contact Rae Crider via email (searetpd14@comcast.net) or cell (206-920-5684). Thank You!
Lake Cavanaugh Community Happenings

Barbara Busby

**Oso General Store** reopened early in March. The new owner is Jana Hecla. Store hours are from 6 a.m. to 11 p.m., seven days a week! Gasoline will be available the week of April 13th.

The store is stocked with groceries and fresh produce; organic produce will be arriving soon.

Along with groceries, fresh coffee and Lattes, there is a Deli and a good selection of beer and wine plus gifts, jewelry, sporting goods, fresh flowers, plants, Oso Tee shirts and “Prison Blue” jeans. There is also a Lending Library. Fishing Licenses, Hunting Licenses and Discovery Passes can also be obtained at the store.

Future plans include a Beer Garden on the back patio with music on weekends, weather permitting.

The Oso General Store will soon be on the “Red Rooster Route” (Red Rooster.com), a tour of local Unique Gardens, and Visitor Attractions. The really amazing thing is that Jana is a young grandmother raising her two grandchildren ages 3 ½ and 9 months old.

When you can, please stop by and lend your support to Jana and the Oso General Store!

**Oso Slo BBQ** - Hungry? On weekends, beginning at 11 a.m., lunch is being served in the Parking Lot at the Oso Store.

Menu includes: Pulled Pork Sandwiches, or Brats served with homemade Potato Salad and Cole Slaw - $7.00; Hot Dog with Potato Salad and Cole Slaw - $5.00.

Oso Slo BBQ is operated by Corey, Nicole and Montana Stenson from Oso.

**Mystic Mountain Farm** - located at 29909 Oso Loop Rd., Oso, WA 98223; proprietors are Chuck and Carrie Snow.

Mystic Mountain Farm is a beautiful Farm setting with much to delight all ages and interests. There are many pets and farm animals plus exotic birds and animals. Farm fresh fruits and vegetable are abundant as well as farm fresh eggs.

They have beautiful hanging flower baskets and a gift shop and tea room. It is a lovely setting for weddings and they have lovely Bed & Bath accommodations.

There is a lovely Mother’s Day luncheon as well as Holiday Wreath making classes.

Mystic Mountain Farm is also on the “Farm Rooster Route”.

**Fruitful Farm and Nursery** - 21308 SR 530 NE, Oso, WA 98223. Phone: 360 631-3494.

Operated by the Hall family and opening Saturday, April 25, 2015.

Family owned, Fruitful Farm & Nursery is a diversified farm & nursery nestled among the beautiful foothills of Washington’s Stillaguamish Valley in Oso.

Using all natural, non-GMO, organic growing methods, we strive to maintain a high standard of excellence in offering our customers a bountiful variety of farm fresh organically grown fruits, vegetables, eggs, home and handcrafted products.

Our colorful Nursery is full of vibrant hanging flower baskets, annuals, perennials, rare ornamental shrubs, trees and dwarf evergreen conifers.

We look forward to serving you!
LCFD Auxiliary News

Lynda Sisley  
LCFD Auxiliary President

Please join us for the annual LCFD Pancake Breakfast on Sunday, May 24th (Memorial Day weekend) from 8:00 a.m. to noon at the Fire Hall. The cost is $6.00 for adults and $4.00 for children 12 and under. On the menu will be made-to-order pancakes, scrambled eggs and ham.

There is also a new batch of the ever-popular Lake Cavanaugh shirts that will be for sale during the breakfast.

The Auxiliary members were busy this spring creating another beautiful quilt for the raffle fundraiser. Tickets will be on sale during the breakfast. The raffle is not drawn until Labor Day weekend but come by and see this year’s design and get your tickets early.

The Auxiliary already has three new members this year! We welcome Beth Scherzo and Jim and Jeri Short. The Auxiliary meets at 10:00 a.m. on the second Saturday of each month beginning in March and ending in October. If you are interested in joining or just want to find out more about the Auxiliary, visit one of our monthly meetings or email me at lsisley@juno.com for more information. Everyone is welcome!

We look forward to seeing everyone at the breakfast! Funds raised help support our Fire Department so come and join us Sunday, May 24th!

2015 Fireworks Information

Larita Humble

Below is a reminder of the legal dates and times allowable to ignite fireworks in legal areas of Washington State including Lake Cavanaugh. For additional information regarding fireworks and related issues, please refer to the lake website at www.lakecavanaugh.info and click on the fire department link. Please share this important information with friends, family and neighbors to help to maintain a safe and legal community.

From the Office of the State Fire Marshal - the dates and times common fireworks may be legally sold or discharged in areas with no ban or restrictions are:

June 28th ..................Between 12:00 noon & 11:00 PM
June 29th thru July 3rd.......Between 9:00 AM & 11:00 PM
July 4th ..........................Between 9 AM & 12:00 Midnight
July 5th ..........................Between 9 AM & 11:00 PM
Dec. 31st .....................Between 6:00 PM & 1:00 AM

What kinds of fireworks are ILLEGAL in our state?

Firecrackers - ¼ “ x 1 ½” or less and contain less than .13 grams of powder.

Bottle rockets - ¼” x 1 ½”, attached to a 12” stick, and their color may vary.

Skyrockets - ½’ inside diameter, attached to a stick for guidance, and contain up to 20 grams of powder.

These fireworks are illegal, except on tribal lands, and cause 90% of all fireworks related fires in Washington State.

Violation/911 calls regarding Illegal Fireworks

The offense is a criminal violation with a bail of $250.00. Violations of over one pound of explosives is a $500.00 bail.
The Lake Cavanaugh Community Needs YOU!

Have you wondered how to meet people in the community or how to get involved? Here are two possibilities:

1) **Database Administrator.** Not as complicated as it might sound! It’s simply a matter of taking over the management of our Lake Cavanaugh property owners database. The Administrator runs the labels and/or provides email addresses for distribution of the newsletter or other similar needs. Want more information? Contact Joe Busby at joeb@pwrc2.com. He has been managing the database for several years and is ready to help the community in other ways.

2) **Lake Cavanaugh Newsletter Editor.** What do L. Frank Baum, Paul Hume and Cynthia Westover Alden have in common? They were all famous editors in their time. Ever wanted to try your hand at editing? I can’t promise you’ll get famous but you can certainly give it your best try with the Lake Cavanaugh Newsletter! Work with the current editor to publish the Lake Cavanaugh Newsletter, with the goal of taking over the duties completely. The Newsletter is published only four times per year (early May, late June, August and October); it is a wonderful way to get a complete view of all the happenings around the lake! Interested? Want more information? Email Lise Richardson at lise_richardson@hotmail.com.

Annual Litter Pick-Up Update

*Barbara Busby*

Thanks to all who participated in the Annual Litter Pick Up. Overall, there was much less litter than in years before. And, as a bonus, it was a nice day to be out picking up. Skagit County Public Works had the bags of litter picked up early the following Monday morning!

What else is Skagit County Public Works doing this summer?

Dale let Barbara know that his crew will be chip sealing Granstrom Road later this summer. Other than that, there are no major projects planned.

Thank you, Dale, and Thank You, Barbara!
Lake Cavanaugh History:

STEAM DONKEY – NEW TOOL IN THE LOGGING INDUSTRY

Kurt Wold

The terms in all industries of commerce and trade continue to evolve. In the logging industry the same is true, the industry evolved and new devices helped improved operations. Below we will talk about the Steam Donkey that was in use here at Lake Cavanaugh by English Logging Company.

On April 1st 1884 the Skagit News reported the first Steam Donkey engine was used in Skagit logging camps. The year 1881 is generally declared the beginning of technological change in the logging industry. Up until then, men, oxen and horses carried and moved loads. In Eureka, California that year, John Dolbeer a successful logging company business owner, applied for a patent for the Steam Donkey engine; it was not a name he chose. Early loggers gave it that humble name because the original model looked too puny to be rated in horsepower and the name stuck.

The Donkey engine sat on heavy wooden skids. It was an upright wood-burning boiler with a stovepipe on top that was attached to a one-cylinder engine, which drove a revolving horizontal drive-shaft with spools at each end for winding rope, later steel cable. The simple purpose of the Donkey was to pull logs up or down hills to where they could be consolidated to a primary transport to the lumber company. In our case, to the English Logging Companies rail lines that traveled to Lake Cavanaugh. Steam Donkeys were also found in the mining, maritime and nearly any other industry that needed a powered winch.

Operating an early Donkey required the services of three men, a boy and a horse. One man, the “choker-setter,” attached the line to a log; an engineer or “donkey puncher,” tended the steam engine; and a “spool tender” guided the whirring line over the spool with a short stick. The boy, called a whistle punk, manned a communicating wire running from the choker-setter’s position out among the logs to a steam whistle on the donkey engine. When the choker setter had secured the line running from the spool, the whistle punk tugged his whistle wire as a signal to the engineer that the log was ready to be hauled in. As soon as one log was in, or “yarded,” it was detached from the line; then the horse hauled the line back from the donkey engine to the waiting choker-setter and the next log. As Steam Donkeys needed to move about the hill as well, they simply attached to an upright tree or log and winched itself on its skids to the new best location.

Over time the Donkey evolved through even more labor-saving changes, including a “haul-back line” through a pulley attached to a stump (that eventually put the horse out of business) and the replacement of steam with kerosene-based combustion engine.

Left: 1896, prior to the Donkey, Lake McMurray area, a single 14’ diameter tree pulled along a traditional Skid Road of logs. Right: An English Logging Company Crew with their Donkey, Lake Cavanaugh area circa 1920s. Credits: Skagit River Journal, University of Washington historical archives, Darius Kinsey photo library
This Poem, **Cavanaugh Rains**, was written by Richard Logg, Sr. Richard attended Oso School from 1954-1956, where he learned his love of the written word from Mrs. Gates. He continues to write in a cathartic manner to reflect her love of life and the gentle, guiding heart she shared with him. Richard dropped out of Arlington High School to join the US Marines in January 1961. He graduated from high school while serving as a US Marine Recruiter in Northern California. He retired as a Master Sergeant in December 1981 after 21 years of service in December 1981. Richard has four children: three sons and a daughter. He has published a book of Poems. He and his wife Rene’e are residents of Arlington, WA, where he owns and operates Small Wonders Upholstery, continues to write Poems and is the family historian.

**Cavanaugh Rains**

Many years have passed since I left your beautiful shore
Adventures, joys and sorrows, extensive journeys to other lands and more

Youth was in my favor when your forests were my home
Now it is age that brings my heart back from the roam

Great Ferns, Cedars, Vine Maples, Oaks, Hemlock, and Mighty Fir
The swampy soils, the many green mosses and butterfly blur

The Brown Bear, the birds, squirrels, the many deer and the cougars too
God’s creatures; shared with me from a peaceful and loving point of view

Comfort my memory of your forest floor, lovely glades and shady glen
That God bestowed upon me in times of need back when

I played and worked on your shores as your rains wrapped me in a sheltering solitude
You asked of me no favor, and I obliged in a manner so unkind and rude

I cut down the trees, drove away the forest animals and spoiled your earth
In a vain attempt to prove my manhood to myself, and to another, my worth

Time is a stern teacher, and wisdom a worthy goal, but hard taught to learn was I
Age alone, comes to those who wander, seldom looking to the heavens on high

Today, memory is the keeper of my sins and at times, heavy is the heart in pain
Remembering my days of youth and how I dismissed the “Grace” of God’s gift of

His forest

and

the beauty of Cavanaugh Rains
Are you due for a “Fire and Safety Tune Up”?

Scott Lemke, Chief
Lake Cavanaugh Volunteer Fire Dept.

Spring has sprung and summer is just around the corner. Summer is a great time to do a “Fire and Safety Tune Up” on your home and vacation property. Here are a few considerations:

- Have your chimney cleaned. Summer may not seem like the right time, but when those first chilly days of fall come back, your chimney will be cleaned and the chances of a chimney fire are reduced.

- Change the batteries in your smoke detectors if you weren’t able too when you rolled your clock forward in March.

- It’s always a good idea to post your address near your phone. Remember friends and family using or visiting your cabin may not know the address if they need to call for help.

- Be mindful when parking along the roads around the Lake. Our roads are narrow and vehicles parked along them make them even smaller. Please yield to emergency vehicles and volunteers with green lights.

- Have a look at your address sign and make sure it is visible to the road. When time is of the essence being able to see your address easily can make a huge difference.

Consider volunteering with the Lake Cavanaugh Fire Department. It’s rewarding and doesn’t take as much time as you think. Anyone over 18 can contribute to the emergency response effort. Please stop by the Lake Cavanaugh Fire Station during one of our drill nights at 6:00 (2015 Schedule to the right).

We look forward to seeing everyone at our annual open house/pancake breakfast.

---

Lake Level Update: Lake Cavanaugh at Normal Spring Levels, Despite Dry Winter

Joe Geivet

Following a historic dry winter where sleds were left in the shed and snow blowers generally idle, many residents have asked how this may impact the summer at Lake Cavanaugh. Our crack team of scientists and engineers have been monitoring the lake level daily through the winter and are happy to report that the lake is within 2/10ths of a foot of the level it was at last year on this date. The elevation of the lake is presently around elevation 1010.3 feet.

Lake Cavanaugh is not fed from snowpack in the mountains. Our water comes from rainfall within an 8.2 square mile basin. The tallest peak within this basin is Frailey Mountain (Elevation 2,681) which is well below snowpack elevations. The Lake level is generally referenced to be at elevation 1009 ft above sea level. Runoff from rain within this basin drains to Lake Cavanaugh through dozens of small streams. Without rainfall, the lake typically lowers about ½ inch per day. Lake Cavanaugh holds a total of about 11.7 Billion gallons of water and a single inch of water on the lake elevation represents about 23 Million gallons.

Lake levels range from 1008.9 at the end of a very dry summer to 1014 following a melt-off of snow in the winter. Summer 2014 saw the low lake elevation at 1009.19 (September 2). This compares with a low of 1009.1 during August of 2013. The highest lake level recording over the winter occurred on November 5, 2014 when the lake touched elevation 1012.44. The prior year had a high elevation in the spring with a recording of 1012.55 on March 7, 2014. The level of the lake will depend on the rainfall we get in our basin. Assuming the rainfall is similar to recent years, we can expect the lake to spring up about a foot or two to 1012 in May then slowly spill out to 1010 by mid-June and down to 1009 by September with most of the summer in the 1009.6 range.

We will continue to monitor the data from the lab and report any additional findings.

Lake Cavanaugh Water Quality Update

Jim Roberts

Each year, from May through September, monthly measurements are made to ensure that the basic health and quality of the lake water meets certain basic standards which define a healthy lake. These measurements consist of the following:

- Water temperature vs depth,
- Depth of visibility from the surface,
- Oxygen content and acidity (pH) in the near-surface layer (0 to 10 feet) and in the deep layer (40 feet to the bottom),
- Fecal coliform count at up to ten diverse locations along the shoreline. These locations are chosen at random and change every month.

These measurements are taken mid-month and are made available at the next monthly meeting. By the time you receive this newsletter, the water quality testing program will have started and the first set of measurements will be presented at the May 23rd LCIA meeting.
